

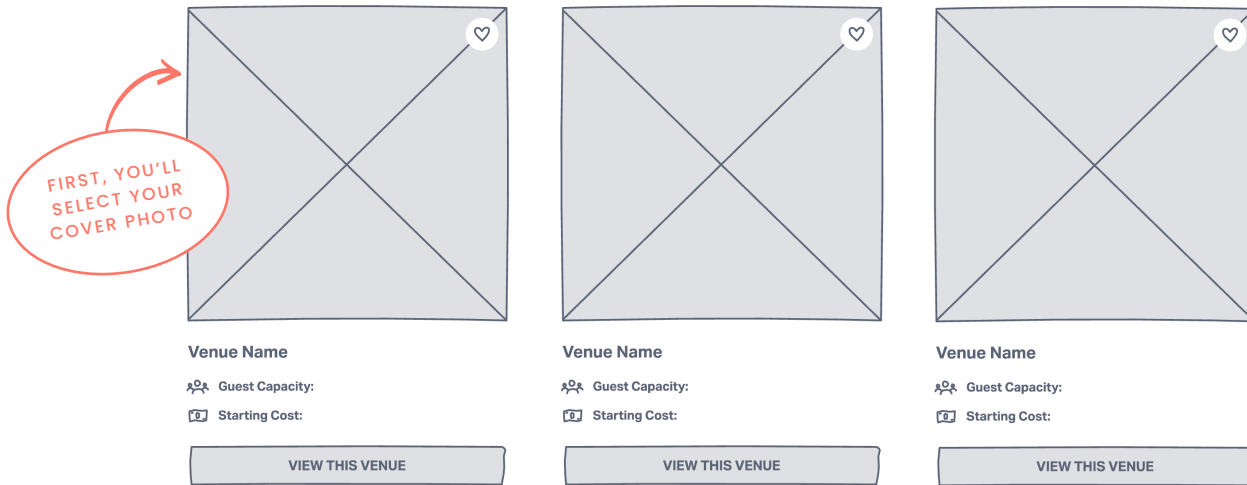

Image File Size Guide

Your Cover Photo

This is most likely the first image a user will see of your venue when they are searching for a venue on the website.

We recommend selecting the best single image that really shows off your venue.

i Image File Size

We have set the max image file size to 5 MB in order to keep page load speeds fast for the best user experience on the website. The file size will still allow for a high quality image.

i Image Ratio

It is important to crop your image to be a 1:1 ratio (square image) for the best display. Images that are not cropped to this ratio will look distorted on the website.

Choose Your Cover Image *(Required)*

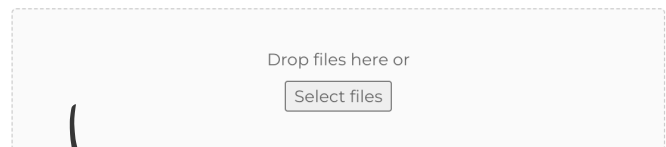

Image Requirements:

- Max image file size: 5 MB
- Image ratio: 1:1 (square) recommended
